

ISTE Seal of Alignment Application

Dimension 1

User Interface and Agency

The design of the product interface and user experience helps the learner quickly and reliably achieve professional growth goals. This dimension includes features related to interface design, learnability, navigation, maximizing time on task, control over actions, and general usability.

1.1 Value Proposition

Teaching Channel provides educators with one centralized platform to connect professional learning directly to classroom practice. Through a robust library of authentic classroom videos, professional development courses, collaborative learning tools, and video-based coaching and reflection, educators can access relevant learning, see effective instructional strategies in action, apply them in their own classrooms, and receive meaningful feedback on their practice. Rather than treating professional development as a one-time event, Teaching Channel supports an ongoing cycle of learning, application, reflection, and growth. Educators can engage in professional learning aligned to individual, school, or district goals; observe real-world examples of effective teaching; reflect on their own instruction using video and time-stamped feedback; and collaborate with coaches, administrators, and peers. By bringing these experiences together in one platform, Teaching Channel makes professional growth more relevant, actionable, and efficient. Educators spend less time searching for disconnected resources and more time engaging in professional learning that is directly connected to their goals, their students, and their daily practice.

1.2 Learnability

The platform provides a straightforward onboarding experience that allows adult users to begin using core functionality with minimal time and effort. When a user is added to the platform, they receive a welcome email with simple instructions for setting up their account. Users can further streamline the process by signing in through their district's SSO provider, such as Clever or ClassLink, or through an LMS such as Canvas, Blackboard, or Brightspace D2L and instantly access platform features.

One link in the welcome email allows users to quickly set their password, while a second link provides direct access to the platform login. The email also includes a link to contact the support team, ensuring that users can easily get assistance if they encounter any issues during setup.

Upon their first login, users receive a brief welcome pop-up introducing them to the platform. After approximately one minute, users can immediately browse the video library, allowing them to begin using the platform's core functionality without requiring extensive setup or training.

1.3 Login

Customers will receive a welcome email to the school email address with instructions how to activate their Teaching Channel account and create a password. Once account setup is complete, customers can access the Teaching Channel Video Library using their school email address and password.

For future access, customers may bookmark the Teaching Channel login page:

<https://auth.k12coalition.com/connect/login?src=platform>

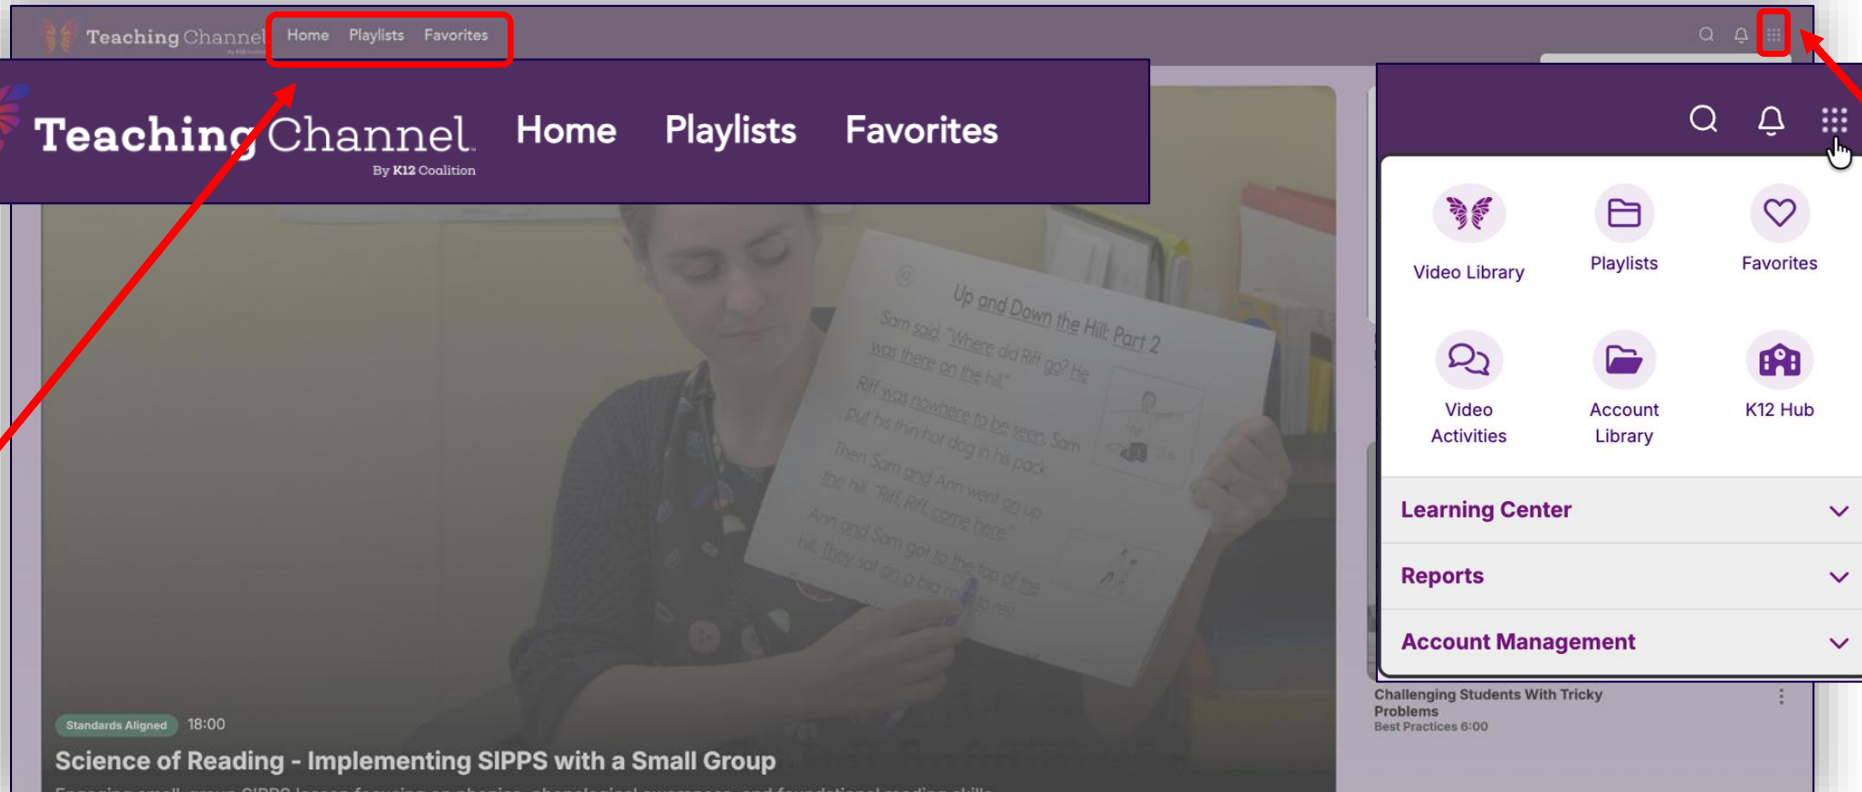

If the district, school or organization prefers a Single Sign On/LTI Access, we support the set up of the following systems such as Clever or ClassLink, or through an LMS such as Canvas, Blackboard, or Brightspace D2L

1.4 Navigation

When a user signs onto the platform, they're taken directly to the homepage providing a clear starting point and sense of location within the product. The navigation options use clear, descriptive titles that help users understand where each option will take them. Breadcrumbs and other location indicators help users understand where they are within the platform. Navigation options are clearly labeled, making it easy for users to understand what each area contains and quickly find the features they need.

From the top navigation bar, users can quickly access playlists they have created, playlists that have been shared with them, their favorite videos, and at any time, return to the homepage.

If users select the waffle menu, they can easily navigate to additional features, including the full video library, video activities, reports that provide information about their usage, and other product features.

1.4 Navigation (Continued)

When a user signs onto the platform, they're taken directly to the homepage providing a clear starting point and sense of location within the product. The navigation options use clear, descriptive titles that help users understand where each option will take them. Breadcrumbs and other location indicators help users understand where they are within the platform. Navigation options are clearly labeled, making it easy for users to understand what each area contains and quickly find the features they need.

From the homepage, users can find videos organized into popular categories such as What's New, Science of Reading, Math, and STEM. They can also navigate to their Video Activities and Playlists, making it simple to find frequently used content and access their personalized resources.

1.4 Navigation (Continued)

When a user signs onto the platform, they're taken directly to the homepage providing a clear starting point and sense of location within the product. The navigation options use clear, descriptive titles that help users understand where each option will take them. Breadcrumbs and other location indicators help users understand where they are within the platform. Navigation options are clearly labeled, making it easy for users to understand what each area contains and quickly find the features they need.

If a user accidentally adds a video to a playlist, they can quickly remove the video to easily undo the error and return the playlist to its previous state.

If a user forgets to add documentation when uploading a video, or later decides to edit the video details or add documentation, they can easily return to the video and make these updates through multiple navigation paths.

1.5 Interface Design

The platform's interface organizes buttons, links, and content in a clear and consistent way, with frequently used features and important content prominently displayed. The homepage puts video content front and center, while the top navigation provides quick access to commonly used features such as playlists and favorites. Additional features are organized within the waffle menu, keeping less frequently used options accessible without creating visual clutter. Consistent navigation, recognizable icons, and multiple access points for frequently used features make the overall experience intuitive and efficient.

The image shows a screenshot of the Teaching Channel sign-in interface. At the top left is the Teaching Channel logo, which consists of a colorful butterfly icon followed by the text "Teaching Channel" and "With Learners Edge" in smaller text below it. Below the logo is a horizontal line. The main heading "Sign in" is centered. Underneath is an "Email" label followed by a text input field containing "antonia.fields@teachingchannel.com". Below that is a "Password" label followed by a password input field with masked characters. A link for "Recover password?" is positioned below the password field. A large, dark blue "Sign In" button is centered below the form fields. Below the button is a link for "Contact Us". At the bottom, there is a yellow box with the heading "District Portal or LMS Users" and a paragraph of text explaining that users should return to their original access point (like SSO or LMS) to relaunch the platform, listing examples like Clever, ClassLink, Google, Microsoft Entra, Canvas, Schoology, Brightspace D2L, and Blackboard. The entire interface is framed by a thick black border.

District Portal or LMS Users

If you access Teaching Channel via Single Sign-On (SSO) or LMS, please return to that original access point to relaunch Teaching Channel. Examples of SSO or LMS include Clever, ClassLink, Google, Microsoft Entra, Canvas, Schoology, Brightspace D2L, Blackboard. If you have any questions, please reach out to your district or institution for support.

1.6 Discoverability

The video library design features a predictable structure by providing clear, easy-to-use navigation and filtering tools that help users quickly narrow down available content. Filters are visible and intuitive, allowing users to browse the library based on relevant criteria without having to search through large amounts of content manually. The consistent layout and predictable filtering patterns make it easy to refine results, adjust selections, and explore different content, creating an efficient and user-friendly browsing experience.

Educators can quickly narrow search results using easy-to-use filters for grade level, subject, topic, standards, and video length. This makes it simple to find relevant content that aligns with specific classroom needs and professional learning goals.

1.8 Customizable Interface

Teaching Channel provides different levels of access based on the product configuration selected by an organization. Across these configurations, users have access to video-based professional learning resources, while the availability of additional tools varies by level.

As demonstrated in the screenshots below, the **Starter** experience provides access to the Teaching Channel video library without coaching tools.

For the Org Admin role in the platform, the administrator has additional access to the reporting and account management features.

1.8 Customizable Interface (Continued)

With a Professional account, organizations have access to the Teaching Channel video library as well as coaching tools such as Video Activities, Assignments, and In-Person Observation. Coaches can incorporate Teaching Channel videos into coaching workflows or upload organization-created videos to build a custom district library.

This allows districts and organizations to curate content around their own instructional priorities, coaching initiatives, and local exemplars rather than relying solely on a fixed collection of content. The interface and available features can also vary based on account configuration and user role, providing administrators, coaches, and other users access to the tools appropriate to their responsibilities.

Teaching Channel therefore supports interface customization primarily through configurable features, role-based access, customizable coaching workflows, and organization-specific content and video libraries.

Figure 1.8.2: Professional Video Library and Coaching Tools

1.9 Technical Support

Teaching Channel provides districts and organizations with dedicated implementation support and on-demand resources to support successful platform adoption. Each partner is assigned a Client Success Manager who assists with setup, onboarding, training, troubleshooting, and ongoing implementation needs.

Users also have access to self-service support, including *New to Teaching Channel* videos, platform guidance, and Notification Center updates with direct links to relevant tools and resources. Together, these resources provide both personalized assistance and in-platform guidance to help users confidently navigate and use Teaching Channel.

Figure 1.9.1: New Teaching Channel Introduction video

Figure 1.9.2: CSM Introduction to Accessing

1.10 Interoperability

The Teaching Channel Video Library supports interoperability with Learning Management Systems (LMS) through LTI 1.3 integrations. These integrations allow Teaching Channel resources to be incorporated into existing school and district technology environments while providing users with streamlined access to platform content.

Teaching Channel can provide documentation and examples demonstrating supported LMS integrations and how Teaching Channel content appears within an integrated learning environment.

Global Access from the LMS, Canvas, through LTI Integration

Access for LMS, Blackboard, through LTI Integration

1.10 Interoperability (Continued)

For example, Teaching Channel's LMS integrations can support single sign-on (SSO) and allow Teaching Channel videos and curated playlists to be embedded directly within LMS courses, assignments, and modules. LTI configuration also supports the secure exchange of necessary user information, such as name, email address, and user role, to provide appropriate account and platform access.

Select Teaching Channel to access video library.

This screenshot shows the LMS interface with the Teaching Channel integration. A red arrow points from the 'Select Teaching Channel to access video library' text to the 'Teaching Channel' option in the 'Insert' menu. The interface includes a sidebar with navigation options like Home, Announcements, Assignments, Discussions, Grades, People, Pages, Files, Syllabus, Outcomes, Rubrics, Quizzes, Modules, BigBlueButton, Collaborations, Item Banks, Instructor Help, and Lucid (Whiteboard). The main content area shows an assignment editor with a rich text editor and a video player.

Select a video to embed from the video library.

This screenshot shows the Teaching Channel video library. A red arrow points from the 'Select a video to embed from the video library' text to the 'Embed video in-page' option in the video player's context menu. The interface includes a search bar, a list of videos, and a sidebar with navigation options like Home, Announcements, Assignments, Discussions, Grades, People, Pages, Files, Syllabus, Outcomes, Rubrics, Quizzes, Modules, BigBlueButton, Collaborations, Item Banks, Instructor Help, and Lucid (Whiteboard). The main content area shows a video player with a play button and a list of videos.

Video is now embedded in the course assignment.

This screenshot shows the LMS interface with the video embedded in the course assignment. A red arrow points from the 'Video is now embedded in the course assignment' text to the video player in the assignment. The interface includes a sidebar with navigation options like Home, Announcements, Assignments, Discussions, Grades, People, Pages, Files, Syllabus, Outcomes, Rubrics, Quizzes, Modules, BigBlueButton, Collaborations, Item Banks, Instructor Help, and Lucid (Whiteboard). The main content area shows an assignment editor with a rich text editor and a video player.

1.11 Data Privacy

Teaching Channel clearly communicates its commitment to protecting user data through a dedicated, easy-to-find Privacy Policy on its website. The policy explains what information is collected, how it is used and shared, how long it is retained, and the safeguards used to protect it, including SSL encryption and administrative, physical, and technical security measures. Teaching Channel also states that it does not sell personal information. The policy outlines compliance with privacy requirements including COPPA, CCPA, and GDPR, giving educators and institutions clear information about their privacy rights and Teaching Channel's data practices.

First-time users are prompted to review the platform's Privacy Policy upon login.

Dimension 2

Learning Design

The product has features that exhibit and promote the design and customization of learning episodes in ways that align with research-based best practices, including those rooted in the learning sciences.

2.1 Growth Objectives

Teaching Channel connects professional growth objectives to recognized instructional expectations through standards-aligned video content, including ELA, Math, NGSS, and the Danielson Framework for Teaching. Districts can also customize their organization's platform by adding state standards, instructional rubrics, and evaluation frameworks directly into coaching tools to support teacher evaluation and individualized growth plans. Authentic classroom videos and Thought Starters help educators, coaches, and administrators reflect on best practices, connect feedback to clear expectations, and apply learning directly to classroom instruction.

Figure 2.1.1: Filtering by Standards and Frameworks under the Video Library

2.1 Growth Objectives (Continued)

Custom Frameworks within Video Activities allow districts and organizations to align professional learning and coaching to their specific instructional priorities. Teaching Channel Client Success Managers partner with district leaders to incorporate **custom rubrics, frameworks, and reflection prompts** that guide educator observation and feedback. Within Video Activities, educators can apply these resources while engaging in **discussion threads and timestamped comments**, connecting specific moments of classroom practice to growth objectives and supporting focused reflection, feedback, and ongoing professional growth.

Figure 2.1.2: Customized Frameworks available for Video Activities, coaching tool resource inside the Teaching Channel Platform.

2.2 Professional Goals

Teaching Channel's coaching tools support personalized professional growth by giving educators a dedicated space to reflect on their practice, receive meaningful feedback, and set individual learning goals. Educators can upload videos of their own instruction, reflect on their strengths and areas for growth, and share videos with coaches, mentors, or peers for feedback. Time-stamped comments can be aligned to state or district instructional frameworks, helping connect feedback and reflection to established professional expectations. Through this ongoing cycle of self-reflection, targeted feedback, and goal setting, educators can identify areas for improvement and monitor their progress toward meaningful professional learning goals.

00:13 The teacher has arranged the students around a table to work in the small group. This will allow her to give them the individualized attention they require.

Framework

Set a personalized growth goal, upload a classroom video, and reflect on specific moments of instruction using your state or district framework.

2.3 Chunking

Teaching Channel has several tools designed to support chunking by allowing educators to break larger assignments and professional learning experiences into clearly defined topics and modules. Instead of presenting learners with one lengthy task, educators can organize content into smaller, focused sections that guide learners through the experience at a manageable pace.

This is a space for capturing your learning and exploring a personal problem of practice.

▼ Step 1

Due Jan 22, 2026

Reflection: Choose your problem of practice. Self reflect on your observation feedback and your own practice using the RISE rubric as a guide. What are your areas of strength? What are your areas of growth?

Step 1- Click Here! [View Document or Link](#)

▼ Step 2

Due Jan 22, 2026

Playlist

Step 2- Click Here! [Watch Playlist](#)

▼ Step 3

Due Jan 23, 2026

Choose a stakeholder to support you through this work. Submit your choice on the Google Doc below. (This is the same document you did Step 1, reflection on) This can be an ITL, administrator, curriculum coordinator, a peer, or someone from outside the district.

Using the Assignment Maker, educators can create and complete assignments by organizing goals, tasks, and learning modules. This provides a structured way for educators to set goals, engage in meaningful activities, and document progress aligned to their practice. Administrators can access assignments to monitor progress, provide feedback, and support ongoing professional growth.

2.4 Content Type

Teaching Channel intentionally combines authentic classroom video, supporting text, instructional standards, and reflective Thought Starters to deepen professional learning. Video allows educators to see effective instructional practices and teacher-student interactions in real classroom settings, while supporting content provides context and highlights key learning takeaways. Thought Starters extend learning beyond the video by prompting reflection, discussion, and application, helping educators translate what they see into meaningful improvements in their own instructional practice. The user also can download available materials that support the activity inside the video to customize to their classroom when implementing back with their own students.

Figure 2.4.1: Sample of an authentic classroom video allows educators to see instructional strategies, teacher/student interactions, classroom environments, and best practices rather than only reading about them.

2.4 Content Type (Continued)

Figure 2.4.2: Description and Thought Starters complement authentic classroom video by identifying the instructional focus and guiding educators on what to observe. Rather than repeating the video content, Thought Starters deepen the learning by prompting reflection, discussion, and application of observed practices to the educator's own classroom or coaching context.

The image displays two screenshots of a digital interface for lesson ideas, specifically for 'Algebra I - Mixture Problems'. The interface is light purple with dark purple text and buttons.

Top Screenshot: Description Tab

- Lesson Idea** (Grades 6-12) (Algebra) (Word Problems) (+ Add to ...) (Share)
- Description** (Thought Starters) (Materials) (Transcript) (School)
- Algebra I - Mixture Problems**
- Find the result of mixing two solutions of different concentrations.
- National Board Certified teacher Marlo Warburton introduces a fresh approach to teaching the notoriously difficult "mixture" word problems for Algebra I. Using an in-class demonstration and incorporating basic physics principles of weight and distance, Ms. Warburton helps her students visualize, solve - and even enjoy! - these challenging problems.

Bottom Screenshot: Thought Starters Tab

- Lesson Idea** (Grades 6-12) (Algebra) (Word Problems) (+ Add to ...) (Share)
- (Description) **Thought Starters** (Materials) (Transcript) (School)
- Thought Starters**
- 1. How does the "Mixture Picture" help students organize information?
- 2. How does the "See Saw" method help students write an equation?
- 3. How does Ms. Warburton builds a sense of success that helps her students persist through a difficult concept?

2.4 Content Type (Continued)

Figure 2.4.3: Currently have 500 classroom videos aligned with **Standards/Danielson Framework** to help educators connect what they see to instructional expectations and professional growth goals.

The screenshot shows a video player interface with a light purple header. On the left, under 'Instructional Method', there are buttons for 'Grade 6' and 'Math'. On the right, there are buttons for '+ Add to ...' and 'Share'. Below the header, a navigation bar contains tabs: 'Description', 'Standard Alignment' (which is highlighted with a red box), 'Thought Starters', 'Transcript', and 'School'. The main content area is titled 'Standard Alignment' and lists 'Common Core Math' standards:

- 6 - CCSS.Math.Practice.MP1 - Make sense of problems and persevere in solving them.
- 6 - CCSS.Math.Practice.MP3 - Construct viable arguments and critique the reasoning of others.
- 6 - CCSS.Math.Content.6.EE.A.2.a - Write expressions that record operations with numbers and with letters standing for numbers. For example, express the calculation "Subtract y from 5" as $5 - y$.
- 6 - CCSS.Math.Content.6.EE.A.3 - Apply the properties of operations to generate equivalent expressions. For example, apply the distributive property to the expression $3(2 + x)$ to produce the equivalent expression $6 + 3x$; apply the distributive property

Figure 2.4.4: Downloadable and customizable resources extend learning beyond the video by giving educators practical materials they can adapt to their own classroom context. These resources help teachers move from observing effective practices to implementing them directly in instruction, reinforcing key learning takeaways through immediate, real-world application.

The screenshot shows a video player interface with a light purple header. On the left, under 'Lesson Idea', there are buttons for 'Grades 6-12', 'Algebra', and 'Word Problems'. On the right, there are buttons for '+ Add to ...' and 'Share'. Below the header, a navigation bar contains tabs: 'Description', 'Thought Starters', 'Materials' (which is highlighted with a red box), 'Transcript', and 'School'. The main content area is titled 'Materials' and lists several downloadable resources:

- Homework Sheet for Day 1 of Mixture Problems (PDF)
- Seesaw Method for Mixture Problems (PDF)
- Teacher Notes for 8th Grade Mixture Problems (PDF)
- The Seesaw Method: An Easy Way to Work Mixture Problems (PDF)

2.5 Content Adjacency

Teaching Channel creates a cohesive learning experience by presenting authentic classroom videos alongside relevant instructional context, resources, and Thought Starters. Related content and intuitive video controls are organized within the learning experience, allowing educators to easily connect what they see with key information, pause or replay content, and reflect on instructional practices. **Add To** and **Share** tools further extend the experience by allowing teachers, coaches, and administrators to build targeted playlists, share videos with colleagues, and use Video Activities to support asynchronous reflection and collaboration. These integrated tools help teams develop shared instructional language, strengthen best practices, and support ongoing professional growth.

The screenshot displays the Teaching Channel interface. At the top, there's a navigation bar with 'Home', 'Playlists', and 'Favorites'. A video player shows a title 'Using the RACES Strategy for Reading and Writing' from 'Greenleaf Elementary School'. Below the video, there are tabs for 'Lesson Idea', 'Grade 4', 'English Language', and 'English Language Learners'. A 'Share Video' modal is open on the right, showing a 'Select Cohort' dropdown with options: 'Nothing selected', 'Secondary Coach', 'K-5 Coach', 'CHCCS', and 'BTSP'. An 'Add to...' menu is also open, showing options: 'Add to Favorites', 'Add to Playlist', and 'Add to My Activities'. A 'Share' button is highlighted in the video player controls.

2.8 Applied Examples

The video platform provides a variety of real-world teaching examples that educators can use to support professional learning and coaching goals. Videos include both strong teaching exemplars and lessons where teachers encounter challenges, helping educators identify effective practices, common struggles, and actionable instructional takeaways they can apply in their own classrooms.

The screenshot shows a video player interface for a video titled "Kindergarten Routines-Entering..". The video is 3:00 minutes long and is categorized under "Managing Students", "Kindergarten", "Classroom Culture", and "Classroom Strategy". The description, which is highlighted with a red box, reads: "Kindergarten Routines-Entering the Classroom after Recess". Below the title, the description states: "A structured, calming routine for kindergarteners entering the classroom after recess. A kindergarten teacher uses a structured approach to guiding kindergarten students back into the classroom after recess. She demonstrates the importance of maintaining order and safety as students re-enter with high energy. Each student is assigned a number, corresponding to their last name, and they must find and stand on their number before transitioning into the classroom. The teacher skillfully manages the group by encouraging safe body movements, such as walking carefully".

The video library offers a wide selection of concrete teaching exemplars featuring certified teachers and their students in action. Many videos align with state and national standards, providing quality examples of teaching and learning. [Video Clip 2.8A](#)

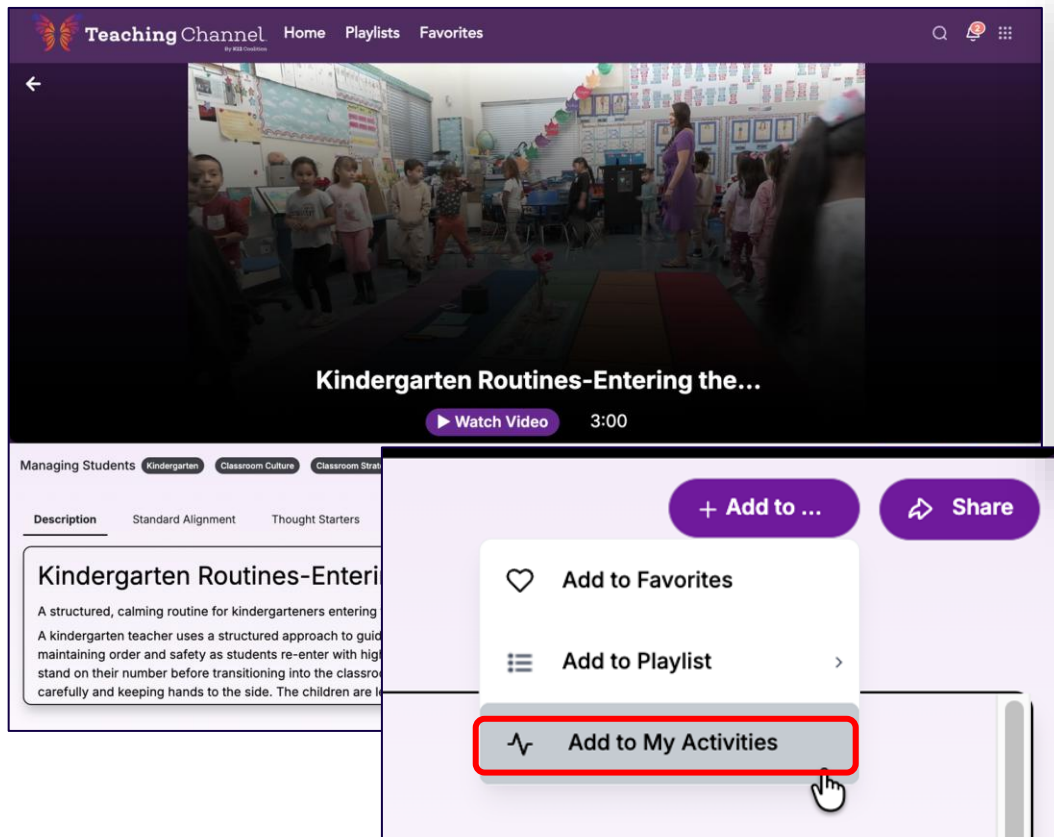

The screenshot shows a video player interface for a video titled "Calling an Audible: Pivoting Mid-..". The video is 6:00 minutes long and is categorized under "Instructional Method", "Grades 9-12", "Math", and "Classroom Management". The description, which is highlighted with a red box, reads: "Calling an Audible: Pivoting Mid-class". Below the title, the description states: "Make a mid-class change in instruction based on student needs. High school geometry teacher Floresa Vaughn 'calls an audible' and changes her lesson plan mid-class based on her observations of how students were handling an assignment. She has them develop a poster to reinforce their understanding before they move on to a more complex assignment. In an interview, she describes why she did it and how it worked."

The library also includes contrasting videos that illustrate how moments don't always go as planned in a classroom and push teachers to consider how to pivot in these moments. [Video Clip 2.8B](#)

2.9 Elaborative Reflection

The platform's Reflection workflow provides embedded tools that support ongoing self-reflection. Educators can use platform videos or upload their own and add time-stamped comments as they watch. Thought-starter questions prompt educators to connect what they observe to their existing knowledge and practice and identify opportunities for growth.

Selecting Reflect on Video allows educators to privately engage with the video and record reflections that are not visible to others.

Any video can be added to My Activities, where educators can select from a variety of reflective workflows tailored to support different learning and reflection goals.

2.9 Elaborative Reflection (Continued)

The platform's Reflection workflow provides embedded tools that support ongoing self-reflection. Educators can use platform videos or upload their own and add time-stamped comments as they watch. Thought-starter questions prompt educators to connect what they observe to their existing knowledge and practice and identify opportunities for growth.

The screenshot displays the 'Reflection on Teaching Channel Video' interface. On the left, a video player shows a classroom scene. Below the video, the title 'Kindergarten Routines-Entering the Classroom after Recess' is visible, along with a description and a 'Thought Starters' section. The 'Thought Starters' section contains three questions: '1. How can assigning numbers help students transition smoothly into classroom routines?', '2. What strategies encourage safety and order when managing high-energy students after recess?', and '3. How does the circular walking routine contribute to a calm learning environment?'. The 'Thought Starters' title is highlighted with a red box. In the center, a 'Leave a Comment' modal is open, showing a comment input field, a 'Type' dropdown menu, a 'Framework' dropdown menu, and a 'Comment' button. The 'Type' dropdown is open, showing options: 'Type', 'Clarification', 'Context', 'Feedback', 'Kudos', 'Observation', and 'Question'. The 'Framework' dropdown is also open, showing options: 'Everyone', 'Demo', and 'Test Reflection Response'. The 'Type' and 'Framework' dropdowns are highlighted with red boxes. Below the comment input, there is a section for 'Show Comments from' set to 'Everyone', and a list of comments. One comment by 'Antonia Fields (Demo)' is visible, with a timestamp of '32 minutes' and a 'Test Reflection Response' link. The 'Test Reflection Response' link is highlighted with a red box. On the right, a 'Leave a Comment' modal is also shown, with a comment input field, a 'Type' dropdown menu, a 'Framework' dropdown menu, and a 'Comment' button. The 'Type' and 'Framework' dropdowns are highlighted with red boxes.

Users can take their reflections further by aligning time-stamped comments to a framework or using comment types to distinguish observations, questions, and connections before adding context.

Thought Starters provide educators with a structured starting point for reflecting on a video and connecting their observations to their own practice.

Dimension 3

Digital Andragogy

The product is designed to support the development of professional digital learning capabilities, knowledge, and skills. This dimension focuses on how technology can help educators and coaches create the best possible learning experiences, including the social and learning affordances that digital professional development products uniquely offer.

3.1 Authentic Learning

Teaching Channel meets the intent of ISTE 3.1 Authentic Learning by grounding professional learning in real classroom practice and authentic instructional challenges. Our videos are intentionally selected and filmed in real educational settings, with schools and educators chosen based on instructional priorities, content needs, and the value of the practices being demonstrated. Teachers provide lesson plans, instructional materials, and classroom artifacts in advance, allowing the video experience to capture not only what happens in the classroom, but also the instructional thinking and context behind the practice.

Rather than presenting a single “perfect” lesson for educators to copy, Teaching Channel uses exemplar videos as models that encourage inquiry, discussion, reflection, and professional problem solving. Educators can examine authentic classroom scenarios, consider how the strategies address real instructional needs, and then adapt or repurpose the ideas, resources, and approaches for their own students and learning environments. This supports the key elements of ISTE 3.1 by giving educators opportunities to engage with real-world problems, develop context-specific solutions, and apply or remix professional learning resources in meaningful ways.

Content is developed with educational expertise, including production leadership with advanced credentials in Curriculum and Instruction and Educational Technology, helping ensure each video is instructionally relevant and intentionally designed to support educator growth.

3.5 Collaborative Interaction

The platform supports collaboration by allowing educators to use platform video content or upload their own video to receive and provide immediate feedback. Users can leave time-stamped feedback at specific points in a video, guided by a rubric, and engage in discussion with facilitators, coaches, or peers. This makes it easy to share work and collaborate around specific content or moments.

The screenshot displays the 'Share Video' workflow. The main interface shows a video titled 'Kindergarten Routines-Entering the Classroom after Recess' with a 'Share Video' button highlighted. A modal window titled 'Share Video' is open, showing options to select a cohort (Demo Cohort 1) and share with specific colleagues (Stephanie Dorsey (Demo) is selected). The 'Share Video' button in the modal is also highlighted. Red arrows indicate the flow from the main 'Share Video' button to the modal and then to the 'Share Video' button in the modal.

Users can use the Share workflow to easily share content (Teaching Channel videos or their own) with a coach or colleague.

3.5 Collaborative Interaction (Continued)

The platform supports collaboration by allowing educators to use platform video content or upload their own video to receive and provide immediate feedback. Users can leave time-stamped feedback at specific points in a video, guided by a rubric, and engage in discussion with facilitators, coaches, or peers. This makes it easy to share work and collaborate around specific content or moments.

The screenshot displays the Teaching Channel interface. The main video shows a kindergarten classroom with a teacher and students. Below the video, the title "Kindergarten Routines-Entering the Classroom after Recess" is visible, along with a description: "A structured, calming routine for kindergarteners entering the classroom after recess." and a link to the "K12 Coalition Core Framework".

On the right side, there are two comment panels. The top panel shows comments from "Everyone" (2 comments). The bottom panel shows comments from "Invited collaborators" (2 comments). Both panels display time-stamped comments with a play button icon and a timestamp.

Comments from Everyone:

- Antonia Fields (Demo) 1d
00:00 Test Collaboration Comment
- Stephanie Dorsey (Demo) 24h
00:45 Think giving the students numbers is a great way to reengage them back from recess to learning.

Comments from Invited collaborators:

- Antonia Fields (Demo)
00:00 Test Collaboration Comment
- Stephanie Dorsey (Demo) 24h
00:45 Think giving the students numbers is a great way to reengage them back from recess to learning.

The bottom panel also includes a "Description" tab and a "Thought Starters" section.

Invited collaborators can leave rubric-based, time-stamped comments and feedback directly on the content.

Dimension 4

Inclusivity

The product helps coaches provide scenarios and real-world examples so that educators can provide relevant learning experiences for interactions with people from many cultures, backgrounds, and abilities. Also creates and supports learner motivation and agency in the learning process.

4.1 Diverse Representation

The video library features diverse educators and students across a wide range of classrooms, schools, and communities. Videos are filmed nationwide in settings ranging from small charter schools to large districts and include representation of varied racial, ethnic, cultural, and socioeconomic backgrounds. The library also includes content featuring English language learners and students receiving special education services, as well as educators ranging from first-year teachers to experienced veterans.

Instructional Method **Grades 5-8** **ELA** **Stations**

Description Thought Starters Materials Transcript School

Meeting the Needs of Diverse Learners

Use stations to provide tailored instruction to students.

Geneviève DeBose describes how she is experimenting with teacher-led small groups in order to provide students with tailored instruction. Before this lesson, she and her co-teacher surveyed students to discover their skill needs, and then formed stations from this data. At each station, students are working on a skill that will help them prepare for a text-based discussion of the book *Wonder*. At the end of class, students share out the specific skills they learned at each station.

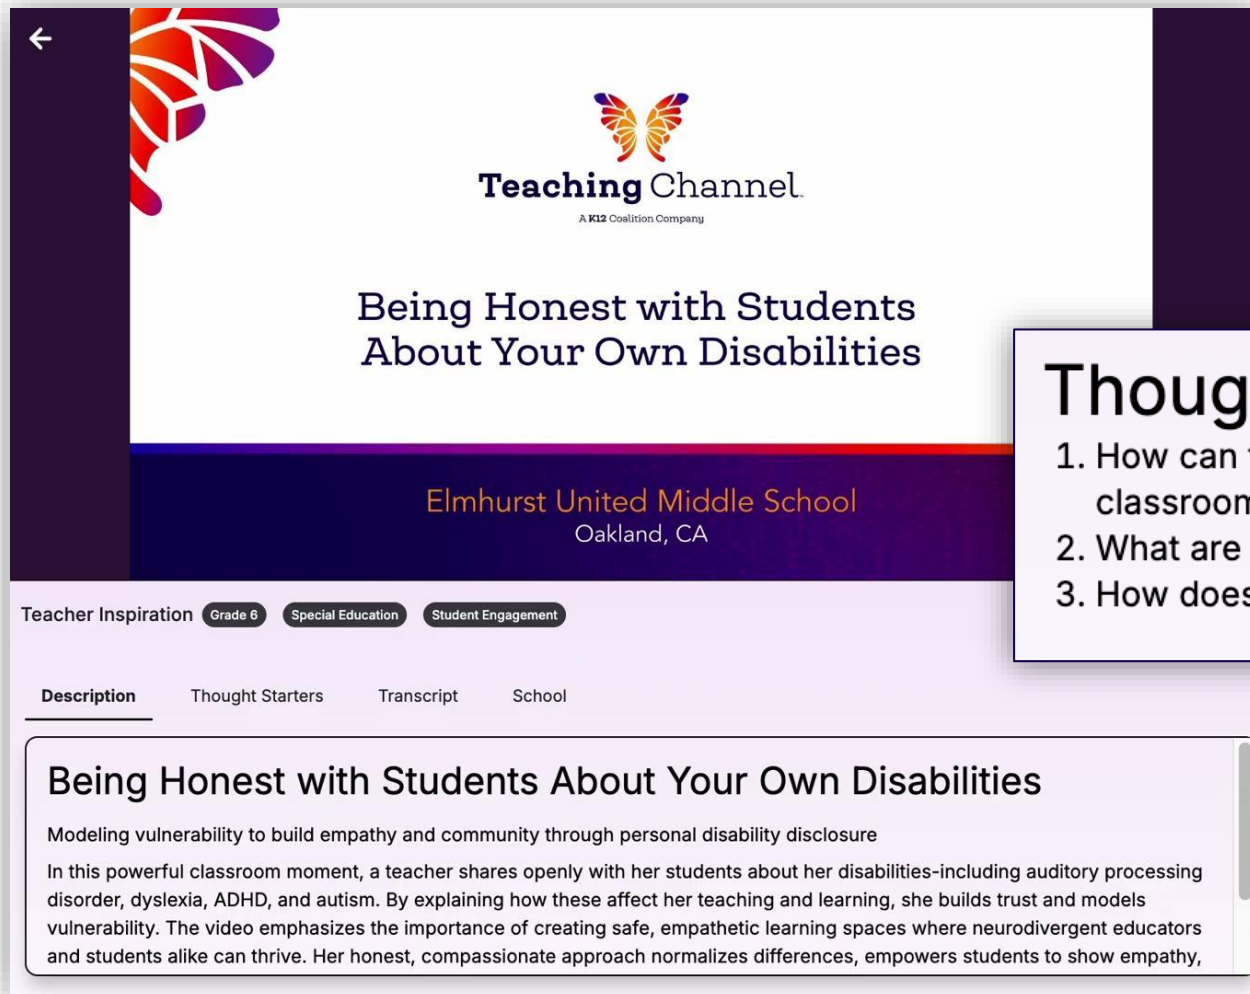

Thought Starters

1. How do Ms. DeBose and her co-teacher Ms. Aldebot use data to inform their planning?
2. How are stations effective in meeting the needs of diverse learners?
3. Ms. DeBose uses her co-teacher and paraprofessionals to lead the stations. How could you plan a lesson like this one if you don't have extra teachers in your classroom?

Thought Starters that encourage conversation and reflection about the video content

4.2 Empathy Opportunity

The video library includes many examples of teachers building empathy and constructive communication through morning meetings, community circles, and classroom discussions. Teachers model perspective-taking by encouraging students to consider others' experiences and viewpoints, reflect on their own perspectives, and recognize how differences can strengthen the classroom community. These examples promote an asset-based approach that values students' diverse experiences and perspectives.

The screenshot shows the Teaching Channel website interface. At the top, there is a logo for Teaching Channel, which includes a stylized butterfly icon and the text "Teaching Channel" and "A K12 Coalition Company". Below the logo, the video title "Being Honest with Students About Your Own Disabilities" is displayed. Underneath the title, the school name "Elmhurst United Middle School" and location "Oakland, CA" are shown. A navigation bar contains tabs for "Teacher Inspiration", "Grade 6", "Special Education", and "Student Engagement". Below this, there are tabs for "Description", "Thought Starters", "Transcript", and "School". The "Description" tab is currently selected, showing the video title and a brief description: "Modeling vulnerability to build empathy and community through personal disability disclosure". The description continues: "In this powerful classroom moment, a teacher shares openly with her students about her disabilities-including auditory processing disorder, dyslexia, ADHD, and autism. By explaining how these affect her teaching and learning, she builds trust and models vulnerability. The video emphasizes the importance of creating safe, empathetic learning spaces where neurodivergent educators and students alike can thrive. Her honest, compassionate approach normalizes differences, empowers students to show empathy,".

Being Honest with Students About Your Own Disabilities

Modeling vulnerability to build empathy and community through personal disability disclosure

In this powerful classroom moment, a teacher shares openly with her students about her disabilities-including auditory processing disorder, dyslexia, ADHD, and autism. By explaining how these affect her teaching and learning, she builds trust and models vulnerability. The video emphasizes the importance of creating safe, empathetic learning spaces where neurodivergent educators and students alike can thrive. Her honest, compassionate approach normalizes differences, empowers students to show empathy,

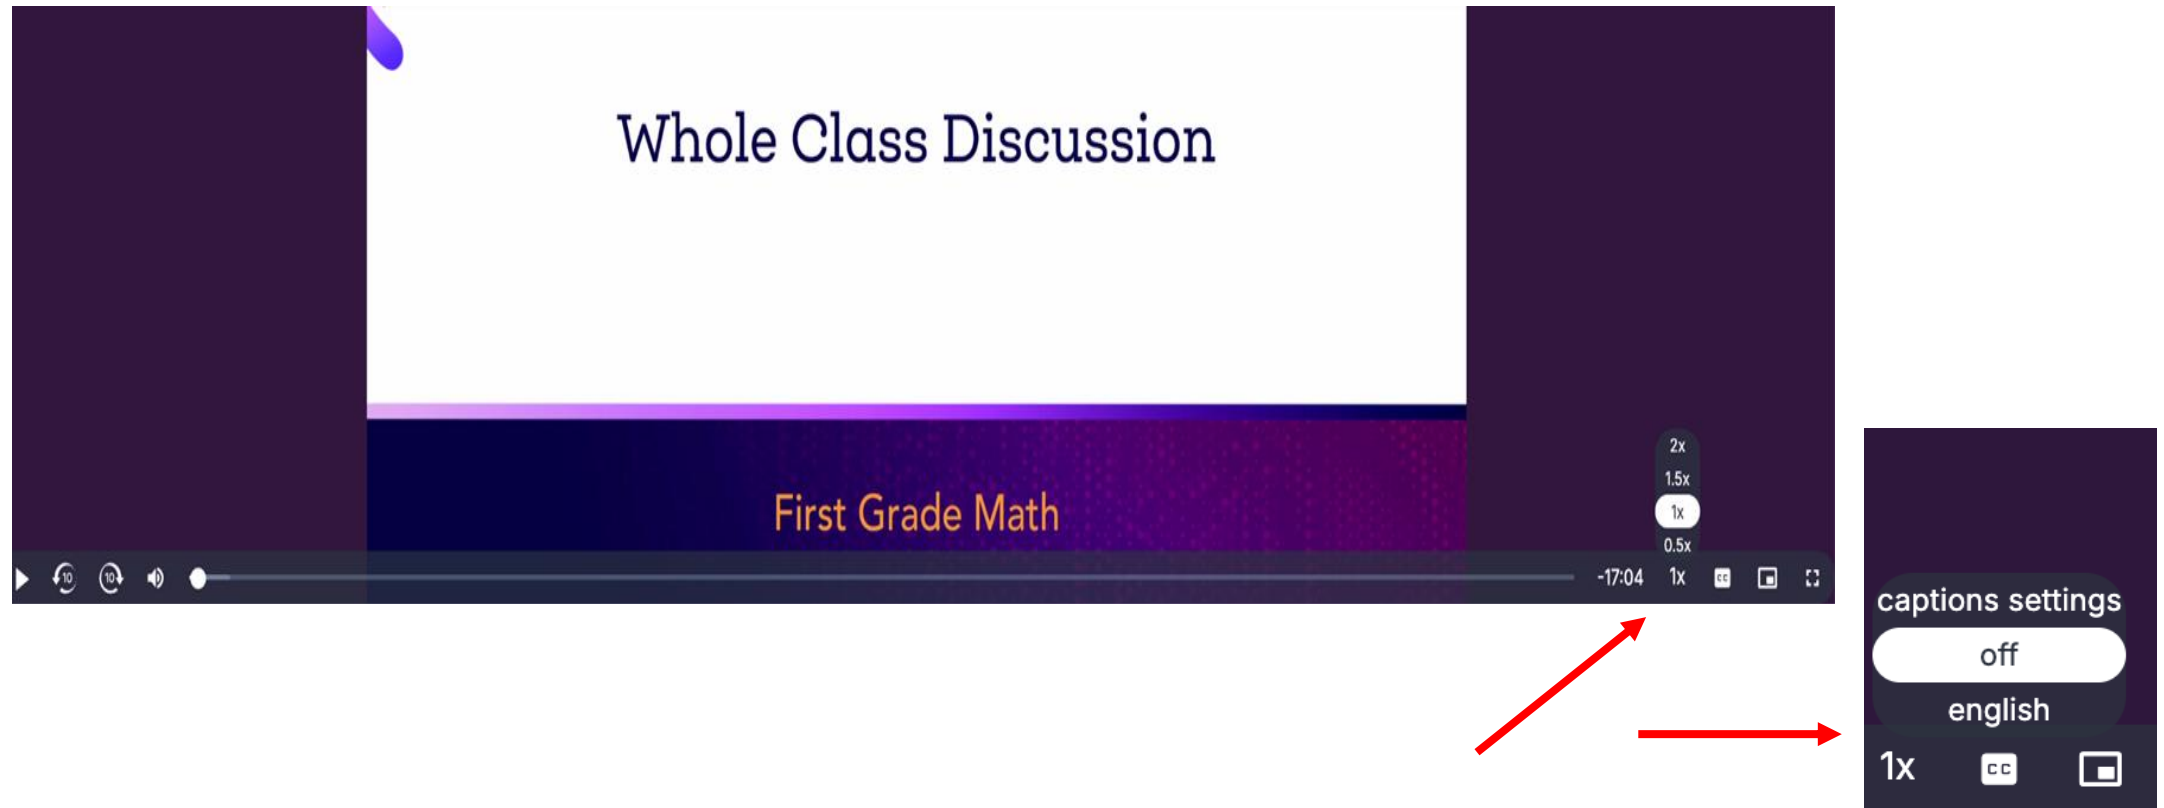

Thought Starters

1. How can teacher vulnerability promote empathy and acceptance in the classroom?
2. What are the risks and rewards of disclosing personal challenges to students?
3. How does normalizing differences support inclusive classroom communities?

Thought Starters that encourage conversation and reflection about the video content

4.3 Accessibility

Teaching Channel is committed to accessibility and alignment with WCAG standards. The platform supports captioned video content, playback speed controls, keyboard navigation, and accessible interface elements. Teaching Channel also maintains a VPAT documenting accessibility conformance and ongoing improvements

All Teaching Channel videos include closed captions and playback speed controls, and the platform incorporates high-contrast design to support accessibility. [2026 VPAT](#)

Dimension 5

Assessment and Data

The product is designed to support the development of professional digital learning capabilities, knowledge, and skills. This dimension focuses on how technology can help educators and coaches create the best possible learning experiences, including the social and learning affordances that digital professional development products uniquely offer.

5.1 Assessment Alignment

Teaching Channel’s video coaching tools provide an ongoing, formative approach to assessing instructional practice. Educators set an instructional goal, upload a video of their teaching, and submit it for evaluation and feedback aligned to that goal or instructional framework. Educators can then reflect on the feedback, apply it in their practice, and submit future videos to demonstrate progress, creating a continuous cycle of assessment, feedback, and growth.

In this example, educators submit a video of their instruction to receive targeted feedback aligned with their professional goals.

This section allows coaches to provide overall feedback, identify next steps, and recommend relevant resources. Educators acknowledge the feedback, making it easy to track progress and apply recommendations to future lessons.

5.1 Assessment Alignment

Teaching Channel courses, accessed directly through the platform's Learning Center, offer multiple ways for educators to demonstrate learning, from "Check for Understanding" quizzes with immediate scoring to classroom-ready lessons, activities, and assessments. Participants receive rubric-based evaluation and narrative feedback tied to course objectives. Coaches and administrators can also assign courses based on observation feedback and individual instructional goals.

Goals and Objectives: As a result of participation in this course, students will be able to:

1. Use provided prompts specific to the use of Google Apps, to describe assumptions and insights of practitioners, researchers and self, including how the information relates to professional educational practice.
2. Design an integrated Site for use in the classroom to deliver content, communicate or demonstrate learning growth.
3. Prepare a Slides activity to facilitate collaboration among students.
4. Implement the use of Docs into a lesson to support learning goals.
5. Develop an action plan to challenge the status quo related to the innovative use of Sheets.
6. Demonstrate the use of features and functions of the following Google tools: Drive, Chrome, Docs, Slides, Sheets, Forms, and Sites.

Course objectives are directly tied to authentic assessments.

NOW DO

Design a Lesson Plan

Time to put your new skills and ideas into play by designing an engaging lesson plan to use in your own classroom! Develop and submit a lesson plan that incorporates Google Docs either as part of your content delivery (teacher created), or as an activity in which students can participate (student-created), or both! Please compose your plan using the [Google Docs Lesson Template](#) (you'll be asked to make a copy), or create your own version in Google Docs. Finally, copy/paste the direct URL for the lesson plan into the document you will submit for Module 2.

5.1 Assessment Alignment

The video below highlights a few assessment examples.

5.4 Performance Demonstration

Teaching Channel courses offer choices for educators to demonstrate learning using different modalities. For instance, participants may decide to present learning about a particular topic in writing, video, or presentation formats. Our Canvas LMS provides an intuitive process for submitting course assignments in multiple file types. Teaching Channel offers help resources at the point of assignment submission to guide course participants in successful navigation, link sharing, and file upload. Following submission, course participants can view submitted files, grades, and feedback within the Canvas LMS. The video below demonstrates a few assignment options available, and the submission process.

Below, an example of opportunities to demonstrate learning in different ways.

[Draw](#) [Record](#) [Write](#)

Record: Use an audio or video recording tool of your choosing to capture your thoughts in 1 min or more. Upload the file to the submission page or paste a link to the recording in your module doc.

The submission process is clear and supported with helpful just-in-time resources.

5.4 Performance Demonstration

The video below demonstrates a few assignment options available, and the submission process.

5.5 Feedback

Teaching Channel enables educators to submit videos of their lessons and receive timely, actionable feedback directly connected to their instruction. Feedback can be time-stamped to specific moments in the lesson and aligned to district or state instructional frameworks, helping educators identify strengths, target areas for growth, and apply feedback to improve future practice. Educators can continue this cycle of reflection, feedback, and improvement over time to support ongoing professional growth.

Best Practices 3 mins 1 sec

Monitoring 1st Grade Math

Monitor student work by probing how students represent and explain a start-unknown story problem.

Feedback is specific, actionable, and aligned to the educator’s instructional framework, allowing it to focus directly on individual goals and targeted areas for growth.

In this example, a coach is providing feedback aligned to their framework.

5.7 Educator Analytics

Teaching Channel provides organization administrators and coaches with clear, actionable reporting to monitor educator engagement and inform professional learning. Library, Video Activity, and User reports provide insight into what content educators are viewing, who is engaging, and time spent learning. Reports can be filtered by users and cohorts, allowing leaders to analyze engagement across specific groups and identify content trends, instructional focus areas, and opportunities for targeted professional growth.

ISTE Standards for Educators

Learner

Teachers continually improve their practice by learning from and with others and exploring proven and promising practices that leverage technology to improve student learning.

2.1.a Learner: Set Professional Goals

Teaching Channel's video coaching and reflection tools help educators set professional learning goals, apply new instructional practices, and reflect on their effectiveness. Educators can upload videos of their instruction, reflect on specific areas of practice, and receive time-stamped feedback aligned to their goals and instructional framework. This ongoing cycle allows educators to revisit their goals, monitor growth, and identify next steps for continued improvement.

Educators can reflect on their video with a specific focus on the instructional goal they established. The platform supports an ongoing cycle of reflection and feedback, allowing educators to share their video with a coach, receive targeted feedback, and then revise existing goals or set new goals based on their progress.

ISTE Standards for Educators

Leader

Educators seek opportunities for leadership to support student empowerment and success and to improve teaching and learning.

2.2.a Leader: Advance a Shared Vision

District and building leaders can adopt the platform to establish a shared vision for improving teacher practice and student outcomes through technology. Leadership communicates clear goals for using the platform, encouraging teachers and coaches to incorporate technology into their practice, which can extend to how students use technology for learning. The platform also encourages educators to record and share their teaching, creating opportunities for colleagues, coaches, and other stakeholders to learn from one another and collaboratively improve practice. This shared approach helps educators become active participants in advancing technology-supported learning across their school or district.

The Coaching Cycle, Using Video During Observation and Debrief

Using video in coaching helps teachers reflect, refine instruction, and enhance student engagement.

In this video, an Instructional Coach discusses how video can be used as a powerful tool during classroom observations and coaching debriefs. The coaching cycle begins with a pre-conference, where the teacher and coach set clear instructional goals and determine success indicators. During the observation, the coach collects data, including scripting and video recordings, to capture authentic classroom interactions. Video provides an objective record that eliminates interpretation bias and facilitates reflective discussions during the post-conference. The teacher and coach analyze engagement levels, student participation, and instructional clarity to identify strengths and areas for

2.2.c Leader: Model Digital Tool Use

The platform provides educators with opportunities to model effective technology use in their own practice. By recording and sharing their teaching, educators demonstrate how digital tools can be intentionally integrated into instruction while creating transparency around their decisions and actions. This process allows educators to explain their instructional choices, experiment with new approaches, collect evidence, and reflect on their effectiveness. Rubric-based feedback helps connect these reflections to instructional goals and evaluations, while collaboration with coaches and colleagues provides opportunities for ongoing improvement. Ultimately, this cycle of modeling, reflection, and feedback supports stronger teaching practices and more meaningful technology use that can positively impact student learning.

ISTE Standards for Educators

Collaborator

Teaching Channel empowers educators to deepen their instructional practice through authentic classroom examples, shared reflection, and collaboration with peers. Educators can exchange ideas, explore new approaches, and apply strategies from real classrooms to strengthen their own practice and support student success.

2.4.a Collaborate with Colleagues

Teaching Channel provides authentic examples of educators collaborating across grade levels and content areas to plan cohesive learning experiences. These videos and Thought Starters give teams a starting point for discussion, shared planning, and designing technology-supported learning that connects classroom instruction to authentic, real-world experiences.

Collaboration in Action: Educators work together to build a shared unit, align instructional practices, and create consistent, meaningful learning experiences across classrooms.

Lesson Reflection: Planning the Next Step

ELA teacher Erin Gilrein and Global Studies teacher Jen Wolfe reflect on a cross-disciplinary Socratic Seminar. After the lesson, the teachers get together to discuss what went well and what could have used improvement. The teachers plan next steps based on the outcomes of their lessons, reflecting both on what they could do differently as teachers and what students could do differently. They examine the performances of individual students and reflect together on including all students in the discussion.

2.4.c Use Collaborative Tools

Teaching Channel provides authentic classroom examples that demonstrate how educators use collaborative technology to connect students with peers, teams, and experts beyond the classroom. These videos give educators practical ideas for designing real-world learning experiences that expand student perspectives, collaboration, and connections locally and globally.

Collaboration in Action: Teaching Channel helps educators discover and plan ways to use collaborative technology with students

See how collaborative practices connect learners with one another, encourage the exchange of ideas, and create authentic opportunities to solve problems and apply learning.

ISTE Standards for Educators

Analyst

Teaching Channel supports educators in using video-based evidence, reflection, and professional learning data to identify areas for growth, make informed instructional decisions, and improve practices that support student learning.

2.7.b Use Technology to Create Assessments

Teaching Channel provides authentic classroom videos and Thought Starters that demonstrate how educators use technology to design and implement formative and summative assessments. Educators can explore these examples to plan assessments that address learner needs, provide timely feedback, and use evidence of student learning to inform instruction.

Technology-Supported Formative Assessment

See how educators use digital tools to gather evidence of student understanding, provide opportunities for response, and use that information to guide instruction.

The video demonstrates how the teacher enhances assessments for vocabulary and literary understanding using technology tools. Students use digital tools to show comprehension, creativity, and engagement, allowing the teacher to provide prompt feedback.

ISTE Standards for Coaches

Collaborator

Teaching Channel helps coaches build collaborative, growth-focused relationships with educators by using authentic classroom video, reflection, and feedback to strengthen instructional practice and improve student learning outcomes.

4.3.a Cultivate Coaching Relationships

Teaching Channel facilitates the complete coaching cycle by providing a collaborative platform where educators and instructional coaches can monitor and celebrate professional development from the initial pre-conference through the post-conference. This environment enables users to establish clear objectives, examine instructional strategies via video, engage in constructive feedback and reflection, and continuously assess progress to foster transparent professional growth.

Pre-Discussion and Goal Setting The instructional coach and educator engage in collaborative pre-planning focused on enhancing student collaboration strategies. Building upon a two-year mentoring relationship, this process further strengthens the professional partnership between the coach and the educator.

4.3.a Cultivate Coaching Relationships

Shared / Curated Playlists

Teaching Channel’s curated playlists allow coaches to select and organize authentic classroom examples around an educator’s individual goals, interests, or areas for growth. Coaches can share targeted resources that encourage exploration and provide a supportive starting point for ongoing coaching conversations and instructional growth.

Example of a playlist for the teacher in the previous pre-planning video, student collaboration strategies, with focus on some ESL/MLL strategies.

ISTE Standards for Coaches

Professional Learning Facilitator

Teaching Channel supports coaches in planning, facilitating, and evaluating professional learning through authentic classroom video, collaborative tools, and engagement data to strengthen instructional practice and student outcomes.

4.5.a Design Quality Professional Learning

The platform gives coaches opportunities to design customized professional learning aligned to district and state frameworks. Through the Assignment Maker, coaches can create custom modules that focus on the specific priorities of a school or district, allowing professional learning to be tailored to current goals, initiatives, and areas of need. This flexibility helps make professional learning more relevant, targeted, and connected to the work educators are doing in their classrooms.

DEMO-April: Procedures and Routines (CCSD NTIA Team Example)

Hello!

The purpose of this space is to allow us to dig deeper into our **Teach Like a Champion (TLAC)** and **Teaching Channel (TC)** resources. Each month, you will be provided with resources and materials that address our learning focus and are aligned to *Teach Like a Champion 3.0* techniques essential for helping to build a classroom culture where academic excellence can thrive.

Structure: After the Introduction section of each monthly module, you will find separate sections for **Teach Like a Champion (TLAC)**, **Teaching Channel (TC)**, and additional **TLAC professional learning opportunities**. The resources include embedded videos and supporting video notes, as well as links to blogs and additional topical resources. The embedded videos are also attached at the end of the **TLAC** and **TC** sections to allow for note-taking and time-stamped annotations directly on the videos. Any resources provided as attachments can be saved to your Teaching Channel My Resources area by clicking on the three vertical dots in the top corner of the resource.

For the **TLAC videos**, you'll notice that each video has a rationale for why you might choose to watch the video, as well as potential focus questions to consider as you watch. Below each **TLAC video**, you will find the complete video analysis notes that are aligned to **Teach Like a Champion 3.0**. When you click on the videos at the bottom, you'll be able to take your own notes (in "My Notes") about what you observed from the video. Additionally, if you click "Supporting Materials," it will bring you to a copy of the video's supporting documents.

> Teach Like a Champion 3.0
